

Clinical Safety & Effectiveness Cohort # 13

**Improve the multidisciplinary approach in the care of patients with
thyroid cancer**

Educating for Quality Improvement & Patient Safety

Background

- **Context:** Scheduling patient with thyroid cancer for I131 involves the many physician located at different locations such as the MARC, TDI and UCCH north. It also involves UHS admissions, bed control, hospitalist, nuclear medicine physicians and technologist, radiation safety and nursing. In addition, the process begins during a follow up clinic visit and can take up to two hours to arrange.
- **Rationale:** At this time the endocrinology fellows are responsible for coordinating this care and as the number of physicians and patients have increased, the process has become more involved which can lead to errors.

Meet the Team . . .

- **Supporter:** Dr. Hillis, Chair Department of Medicine
- **Team Leader**
 - » Jan Bruder, MD, Professor of Medicine, Chief of Endocrinology
- **Other Team Players**
 - » Sonika Gupta, MD, Fellow in Endocrinology, Diabetes and Metabolism
 - » Tim Arakawa, MD, Fellow in Endocrinology, Diabetes and Metabolism
 - » Urban McCarthy-Scheherezada, MD , Fellow in Endocrinology, Diabetes and Metabolism
 - » Alberto Chavez-Velaqueza, MD, Fellow in Endocrinology, Diabetes and Metabolism
 - » Maureen Koops, MD, Associate Professor of Medicine, Div of Endocrinology
 - » Sara Ahmadi, MD Assistant Professor of Medicine, Div of Endocrinology
 - » Lisa Dodges, Bed Control
 - » Theresa De La Haya, RN, Director of TDI
 - » Camarino Salazar, Director of Quality Ambulatory Services, TDI
 - » Tony Herron, RN, TDI
 - » Joe Becker, MD, Assistant Professor of Medicine, Div of Endocrinology
 - » Facilitator: Edna Cruz

What Are We Trying to Accomplish?

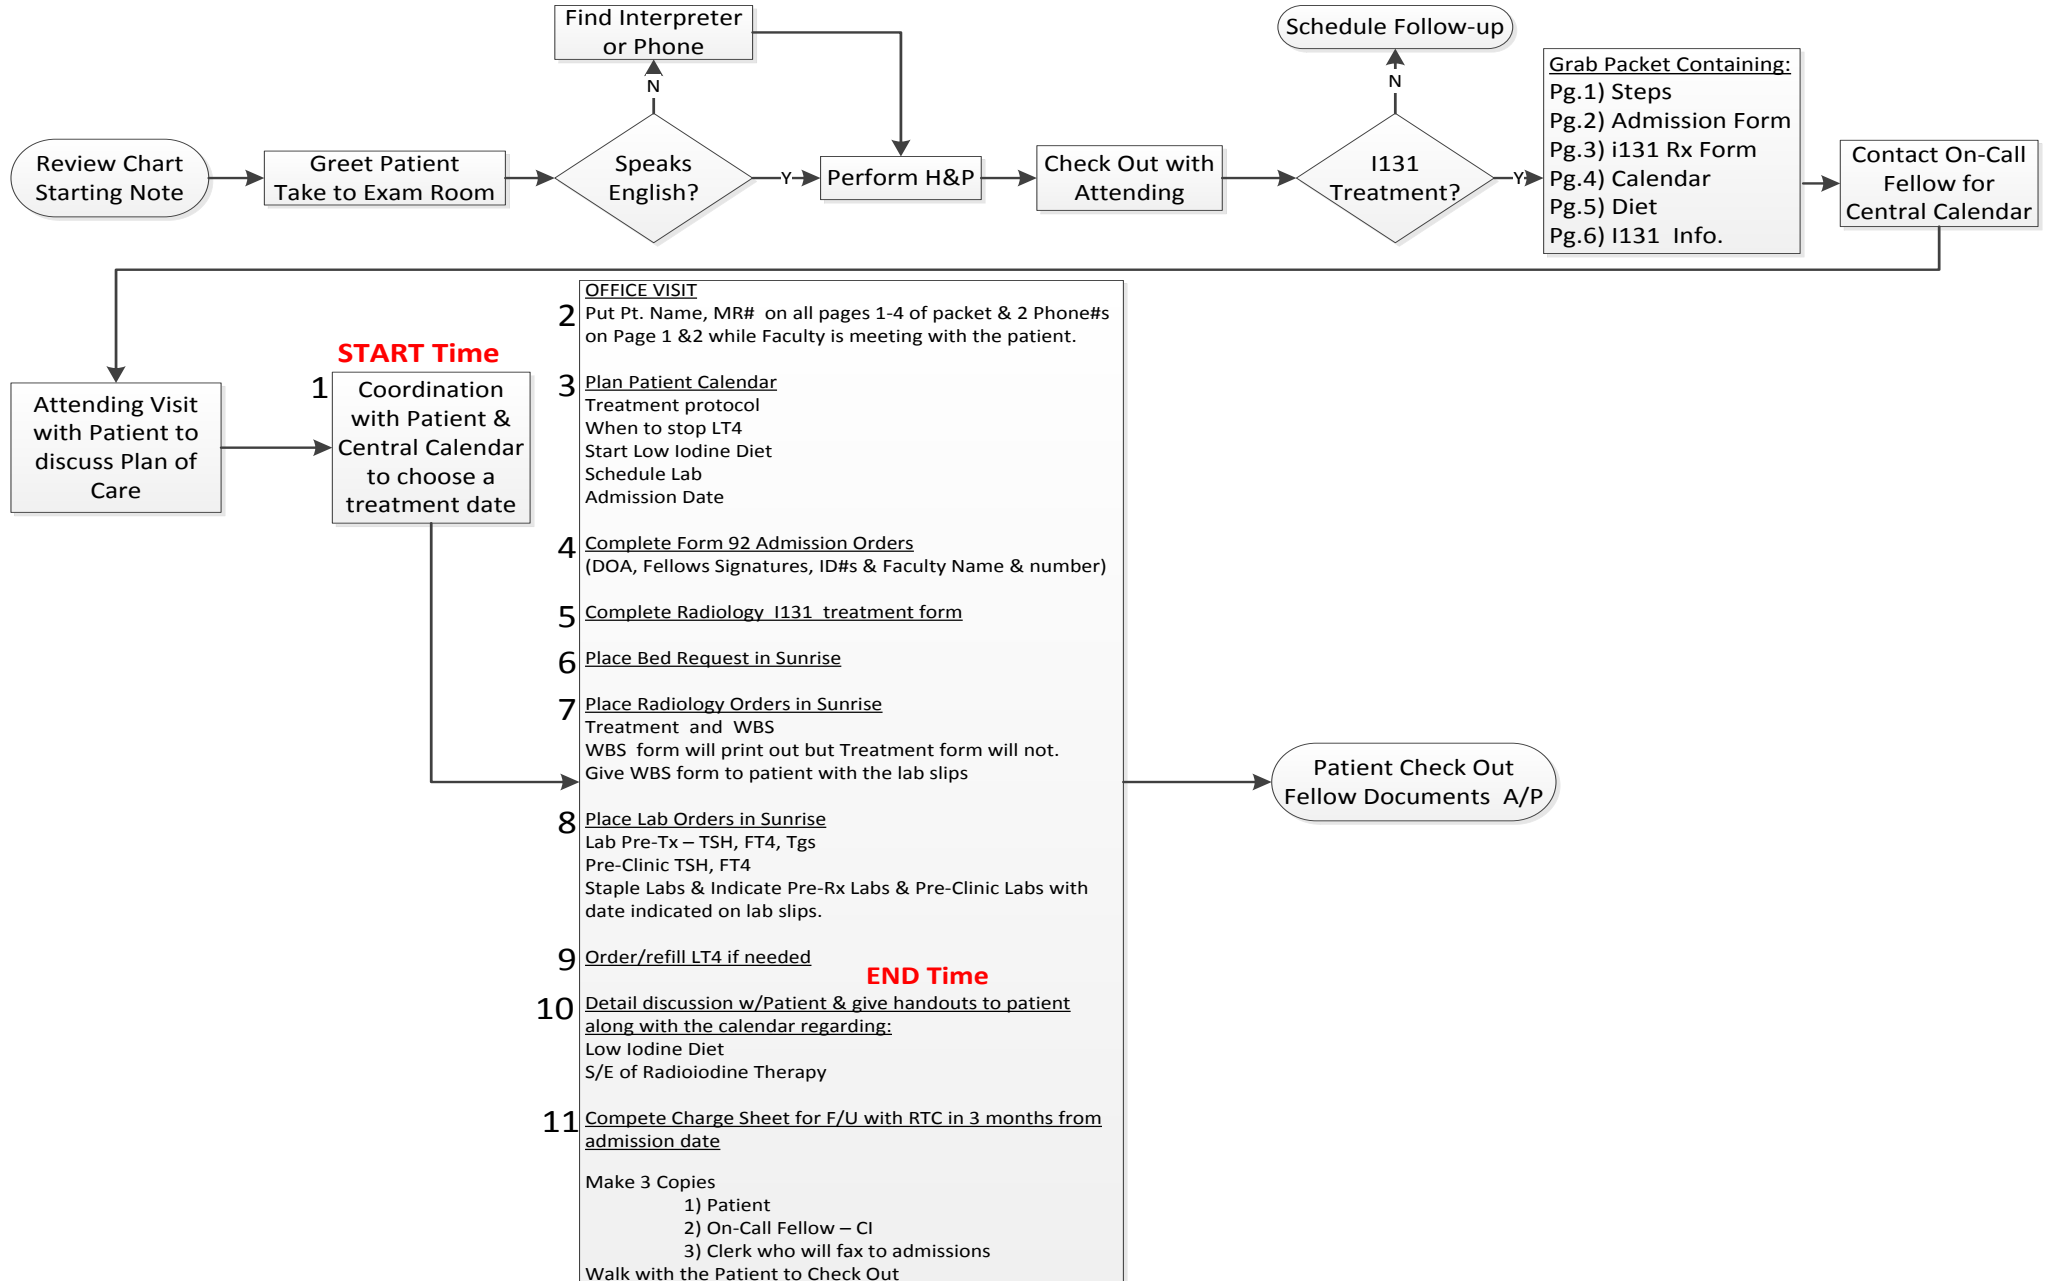

To decrease by 50% the amount of clinic time used to arrange admissions for I131 treatment for patients with thyroid cancer, by implementing an electronic order set and a web based scheduling tool accessible to ordering physicians, nuclear medicine, nursing, radiation safety and admissions by January 2013.

Project Milestones

- Team Created August 2013
- AIM statement created September 2013
- Team Meetings Began September 2013
- Work Flow & Cause & Effects Diagram September 23, 2013
- Data Analysis October 17, 2013
- Multiple emails with SharePoint and IT managers
- Met with TDI physicians November 6, 2013
- Interventions Implemented November 2013
- Collect data December/January
- CS&E Presentation January 2013

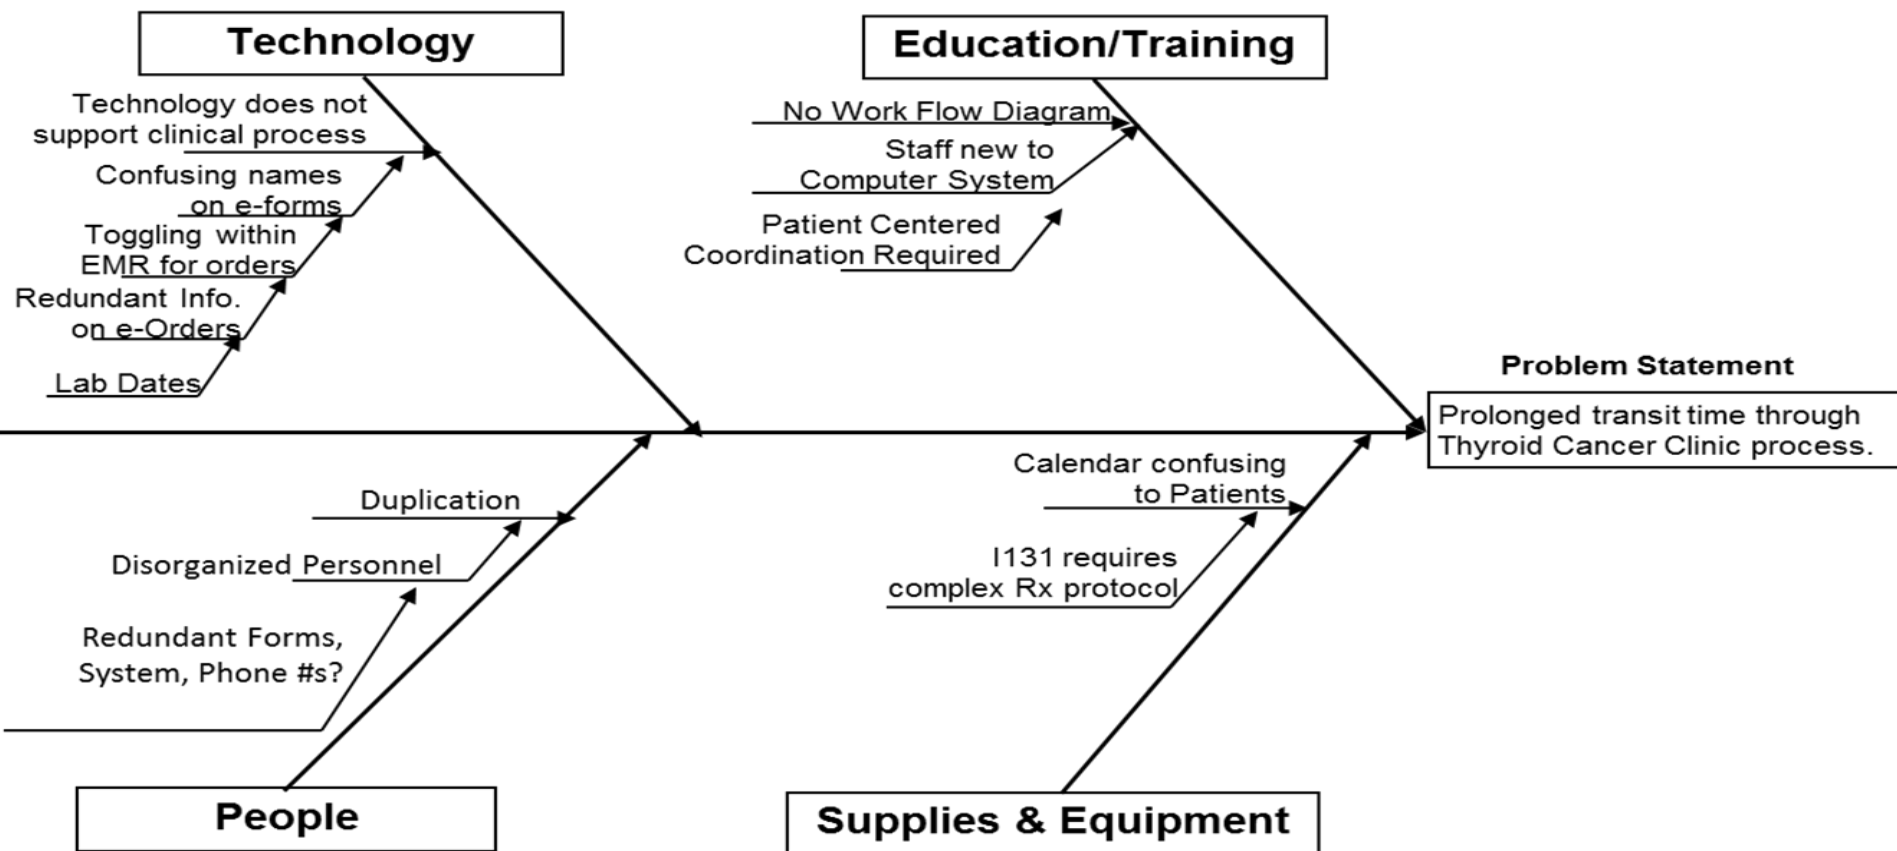

Department of Medicine – Improving the Multi-Disciplinary Approach to Thyroid Cancer Care -- FLOW

UT Department of Medicine

Improving the Multi-Disciplinary Approach to Thyroid Cancer Care Delivery

CAUSE & EFFECT DIAGRAM

How Will We Know That an Intervention is an Improvement?

- **Types of measures** – See flow diagram for start and end time.
- **How you will measure** – Manual data collection via use of observation and a stop watch
- **Specific targets for change** -- To decrease by 50% the amount of clinic time used to arrange admissions for I131 treatment for patients with thyroid cancer by January 2013.

Six Time Points

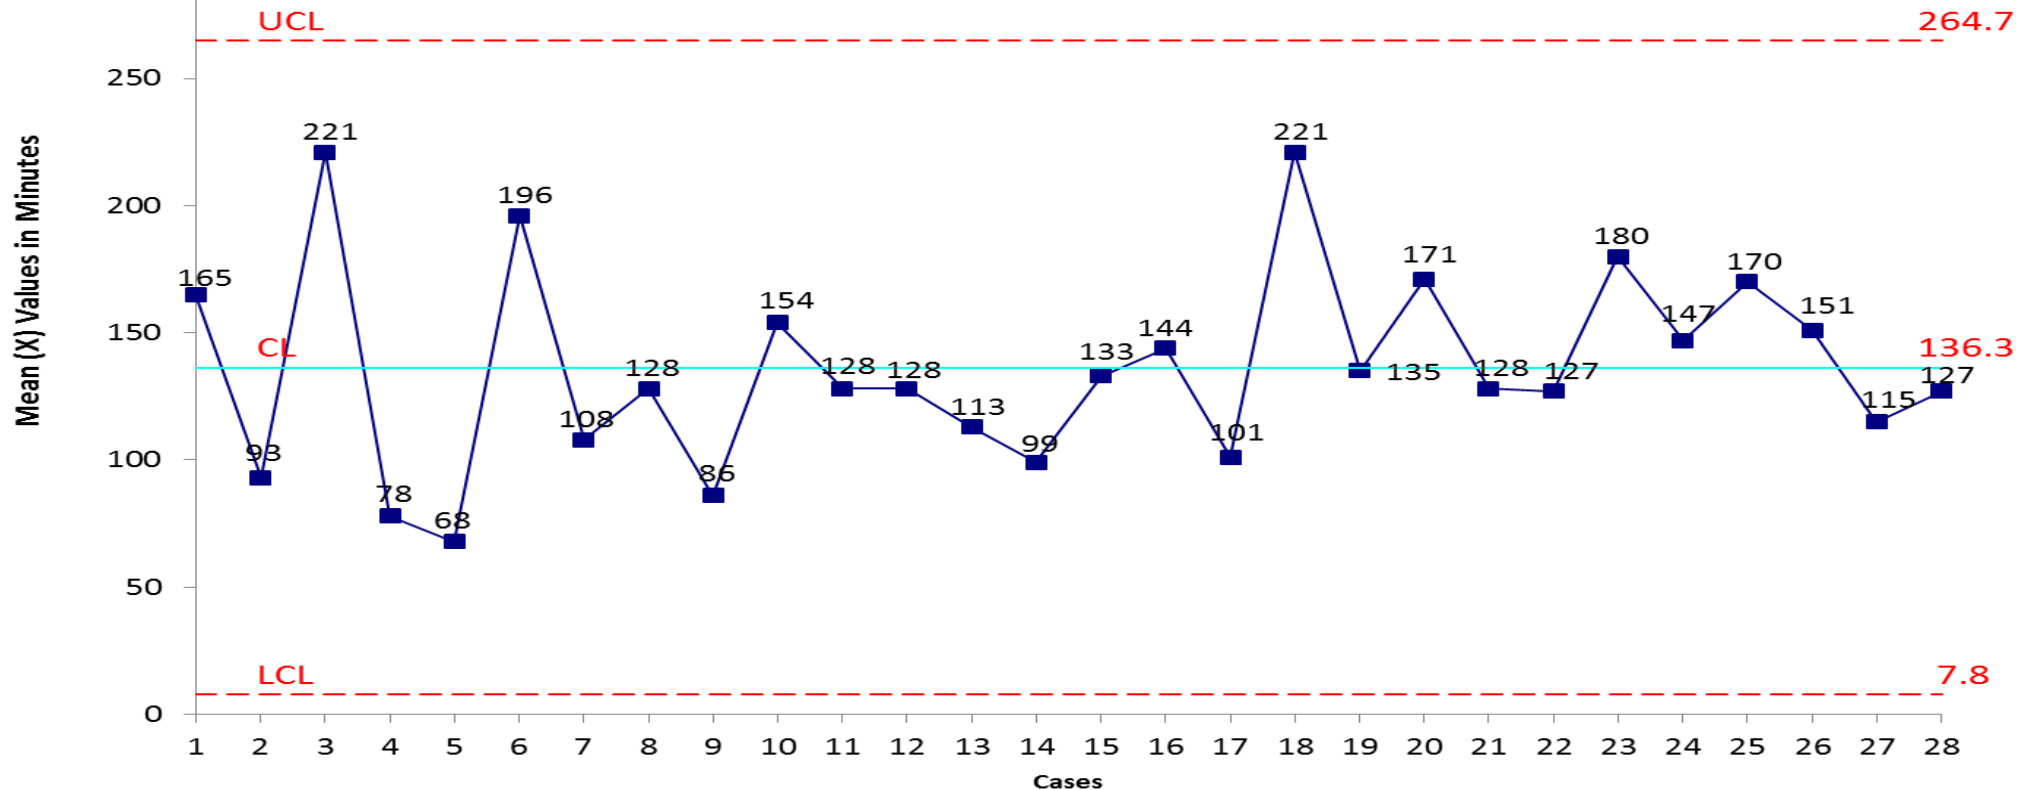

DOS	Physician	Start time	End time	minutes
8/27/2013	Ocampo	1340	1415	25
10/16/2013	Urban	1251	1446	47
10/16/2013	Gupta	1420	1609	35
10/23/2013	Venkatesh	0949	1050	61
11/20/2013	Urban			40
11/27/2013	Chavez	1611	1647	36

How Will We Know That an Intervention is an Improvement?

- We were unable to prospectively get more data using the start and end times.
- Types of measures – The team used a retrospective proxy measure of registration of patient to check out cycle time beginning in January 2013 and end in August 2013.
- How you will measure – The metric used was collected via e-time stamp within the EMR.
- Specific targets for change -- To decrease by 50% the amount of clinic time used to arrange admissions for I131 treatment for patients with thyroid cancer by January 2013.

Pre-Intervention Data

UT Medicine - Improving the Multi-Disciplinary Approach
to Thyroid Cancer Care
Data Timeframe: 2/20/13 -- 10/16/13
Clinic Cycle Time
Mean (X) Chart -- n=28

Comment: Data specific to the timeframe indicated in the flow is being collected. The data shown above represents the time from registration through the patient check out, as this was electronically documented and easily obtained.

Interventions We Will Make That Will Result in an Improvement?

Intervention #1 – e-Calendar for simultaneous notification of all involved in the admission for I131 therapy.

Intervention #2 – e-Order Set for I131 to simplify the process and standardize the orders.

Intervention #1 and # 2

Plan

What? Create an e-calendar on SharePoint and I131 Thyroid Cancer Care Order Set in Sunrise EMR

Who? developed by Drs. Becker and Bruder

Where? The e-calendar to be placed on UHS SharePoint with automatic email reminders to all involved parties and the order set to be placed electronically in Sunrise with pre-determined set of defaults.

When? by November 25

Intervention #1

e-Calendar for simultaneous notification of all involved in the admission for I131 therapy.

I131 Thyroid Cancer Care e-Calendar on SharePoint

The screenshot shows a web browser window displaying a SharePoint calendar. The browser's address bar shows the URL: `http://sharepoint/Endocrinology/Lists/Calendar/calendar.aspx`. The page title is "Calendar - University Health System". The user is logged in as "Joseph Becker".

The interface includes a "Calendar Tools" ribbon with various options:

- Calendar Tools:** Create View, Modify View, Create Column, Manage Views, Share & Track, Connect & Export, Customize List, Settings.
- Share & Track:** E-mail a Link, Alert Me, RSS Feed.
- Connect & Export:** Export to Excel, Connect to Outlook.
- Customize List:** Edit List, Form Web Parts, List Settings.
- Settings:** Workflow Settings, List Permissions.

The calendar view is set to "Month" for "September, 2013". The current date is Thursday, September 05, 2013. The calendar grid shows dates from 1 to 30. A blue highlight is on the 5th. A green "Add" button is visible on the 11th.

On the left side, there is a navigation pane with the following items:

- Calendars in View: Calendar
- Home
- Shared Documents
- Calendar (selected)
- Discussions
- Team Discussion
- Recycle Bin
- All Site Content

The Windows taskbar at the bottom shows the Start button and several open applications: Hyperspace - MARC..., Inbox - Microsoft Out..., Citrix Access Gateway..., Allscripts Gateway |..., Calendar - Calendar..., and Microsoft PowerPoint... The system clock shows 9:08 AM on 9/5/2013.

Thyroid Cancer Initial I-131 Treatment Protocol

FRIDAY ADMISSION – 4.5 week protocol without cytomel

1. Stop thyroid medication (levothyroxine) on Day 1 (_____)
2. Begin low iodine diet on Day 19 (_____) 2 weeks prior to admission
3. On Day 26 (_____), go to the lab for blood work.
4. Doctor will check labs on Day 30 and call you to confirm admission.
5. **Hospital Admission** will be on Day 33 (_____). Go to the Radiology Registration Desk located on the second floor at UHS for admission at 8:00 A.M.
6. Bring lemon drops with you on the day of admission.
7. You will return to Radiology Registration Desk 7-10 days after the I-131 treatment for a Whole Body Scan to evaluate uptake of the radioactive iodine. You will be given the appointment date before you leave the hospital.
8. If you have any questions, call the TDI call center to contact your doctor at 358-7500 or call Radiology at 358-2936 and ask for Robert or Brandon

Intervention #2

e-Order Set for I131 to simplify the process and standardize the orders.

I131 Thyroid Cancer Treatment Order Set

TEST Thyroid Cancer Treat

Admit / Transfer / Discharge

Bed Status Request

- Admit Dx: Thyroid

Bed Status request

- Status - inpatient admission
- Condition on admission - stable
- Estimated length of stay - 3 days
- Admitting Service - Medicine 5
- Accepting Service - Same as Admitting Service
- Admitting Floor - Clinical Decision Unit 6
- Bed type - regular (private)
- Accepting Physician - Hospitalist
- Accepting faculty - Hospitalist on call

Labs

Place the thyroid tests together at the top

- TSH and Thyroglobulin Ag and Ab panel - indicate in special instructions. Blood to be drawn a week prior to admission for I131 treatment
- TSH and FT4 to be T+120 and preclinic

thyroid cancer (193)

Implementing the Change

Action

The order set was piloted by Dr. Bruder on 11/05/13 with appropriate notifications sent to nuclear medicine and bed control. The e-calendar was piloted by Dr. Becker on 11/12/13 with appropriate notifications sent to physicians in nuclear medicine and to administrators in bed control.

Issues identified were redundant emails sent to many recipients. Moreover, a notification email was not sent to the head tech in nuclear medicine. Issues have been reviewed with IT.

Key Time Points

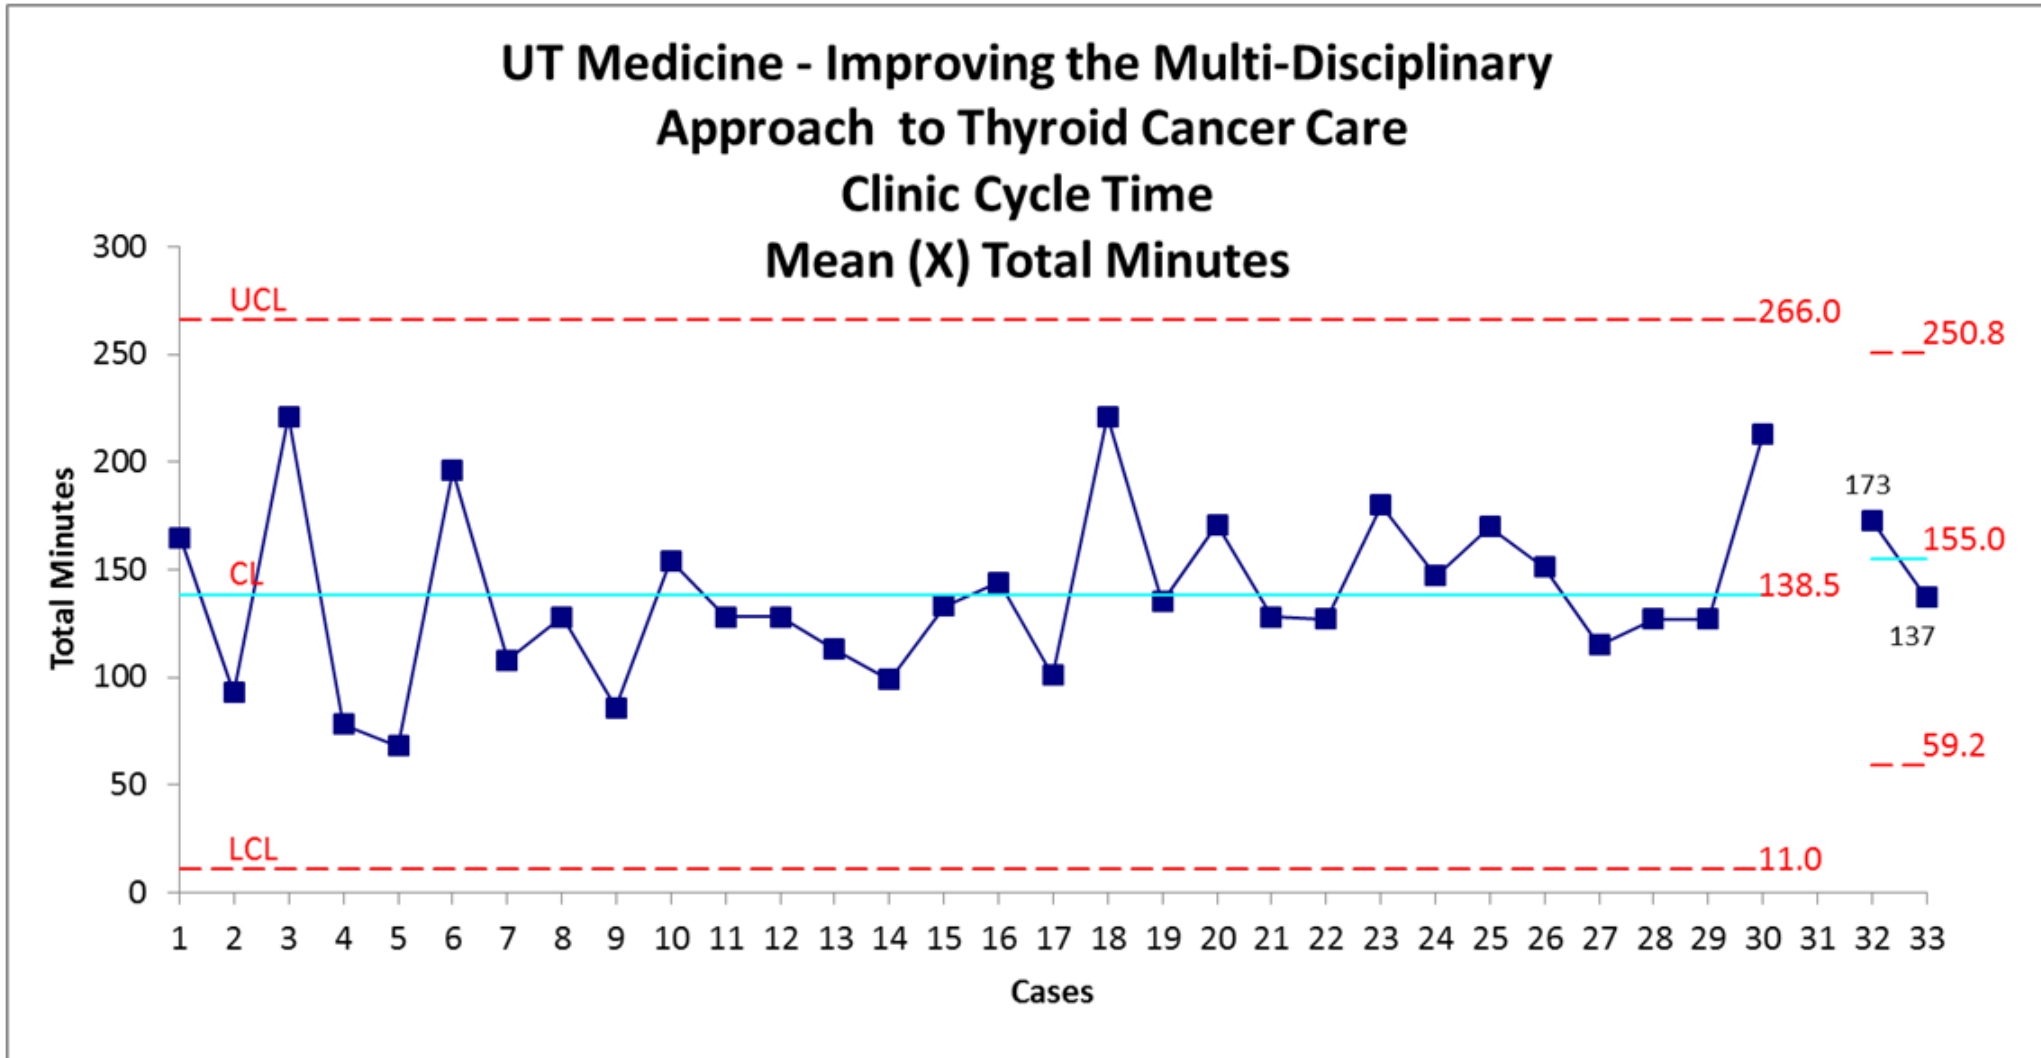

- The order set was moved out of the test mode into the order template “UCCH Endocrine Orders” in Sunrise EMR on 11/25/2013.
- The final email recipients list for the share point calendar was created and retested on 11/25/2013
- The calendar went live in December 2013
- Patients that had been scheduled in the old system were added to the electronic sharepoint calendar in December
- In December, patients were timed using the new system:
 - start and end time per flow diagram
 - Proxy time from check in to check out
 - DATA COLLECTION WAS LIMITED AS A RESULT OF THE HOLIDAYS

Two Post-Intervention Time Points

DOS	Physician	Start time	End time	minutes
12/10/2013	Chavez	437	515	38
1/8/2014	Venkatesh	1308	1336	28

DOS	Physician	Start time	End time	minutes
8/27/2013	Ocampo	1340	1415	25
10/16/2013	Urban	1251	1446	47
10/16/2013	Gupta	1420	1609	35
10/23/2013	Venkatesh	0949	1050	61
11/20/2013	Urban			40
11/27/2013	Chavez	1611	1647	36

Post-Intervention Data

Return On Investment

- Hard Return
 - Net Return or cost savings will be the time saved multiplied by the Fellow salary
 - There are no Investment Cost or denominator

Return On Investment

- Soft Return
 - Improved capability in the form of process/efficiency improvement
 - Fewer errors due to simplification, standardization and automation
 - Ability to maintain existing revenues levels by avoiding denial of payment due to errors
 - Potential to increase capacity while avoiding new hires due to process/efficiency improvements
 - Improved patient and staff satisfaction
 - Reduce/eliminate overtime pay, vacancies and turnover rate

Thank you!

And special thanks to

Chris Portis – SharePoint

Allison Clarke – EMR Orders

Lisa Dodge – Bed Control
