

**Admittance Course Schedule**  
**2<sup>nd</sup> Friday of each month starting in January 2009**

- 9:00-9:15 Course Introduction
- 9:15-10:30 Theory lecture by Dr. Feldman detailing admittance technique
- 10:30-11:30 Practical lecture on the calibration of the admittance system, performance of epicardial murine muscle resistivity measurements, data entry into hardware/software, and calibration of Pressure/Volume catheters and Epicardial surface probes.
- 11:30-12:30 Lunch break
- 12:30-4:00 Supervised attendee use of admittance system- course attendees will practice the necessary surgical procedures and data acquisition techniques required to use the system under the guidance of course instructors.
- 4:00-5:00 Analysis of data- Course attendees will be instructed how to analyze data collected with the admittance system.
